

Crane Rope Examiners Course (2 day)

Bridon has established a reputation for running quality training which is second to none. Our courses never stand still and are directly relevant to trading conditions today. In an increasingly competitive world, costs must be continually reduced without compromising safety.

There is no better way to prepare for this challenge than through a Bridon industry-standard course.

Course Content:

- History of wire rope and international standards that apply
- Rope design and manufacturing
- Wire rope discard criteria
- How and where to examine the rope
- How to report the results of the examination

Included is a factory visit and a practical look at several rope samples. Successful completion of the Bridon Crane Rope Examiners Course grants the attendee a certificate. This course may also be designed to meet your exact requirements and presented as a 1 day course on your own premises.

To enquire about any of the courses please contact rec@bridon.com or contact Services Tel: 01302 38 23 52. Other courses available on request
